Receipt of Wrong Equipment

25X1

REF : Contract XA-1060

1. Your attention is invited to contract XA-1060 for 1,000 each head sets from the Telex Corporation. These head sets were to consist of two (2) ear phones of 2,000 ohms impedance each connected in series to provide a total of 4,000 ohms impedance.

2. A spot check of the ear sets during the past week indicates the impedance varied from 240 to 300 ohms, an approximate 14 to 1 mismatch. The records of the T & E Section, indicate these items were not inspected by that Section but were received directly into stock by the Warehouse Receiving Station.

25X1

3. It is requested that the Telex Corporation be contacted and arrangements be made to return the units to them in exchange for the 4,000 ohm impedance head sets required.

4. This Office has an urgent requirement for this material and it is requested that the exchange be completed by 15 December 1954.
